

Introduction

Managing intellectual property can be a complicated and confusing process. At G2 IP, our experienced IP professionals understand your concerns and are equipped to answer all of your questions. As the latest top notch intellectual property service company in Japan, G2 IP has the tools, expertise and resources to help you manage your intellectual property in the most efficient manner possible.

Technology Experience

Our technology experience includes: organic and inorganic chemicals, automotive, computer hardware and software, semiconductor, electric appliances and components, construction materials, etc.

Please contact us for quotes or more information about our services...

International Services

International Patent Drafting and Prosecution

We specialize in US and international (PCT) patent applications.

Clearance Study

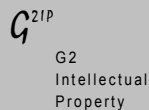

We can help you make sure that your product/process does not infringe on other patents.

Patent Landscape Analysis

We can provide a comprehensive patent analysis for various technologies.

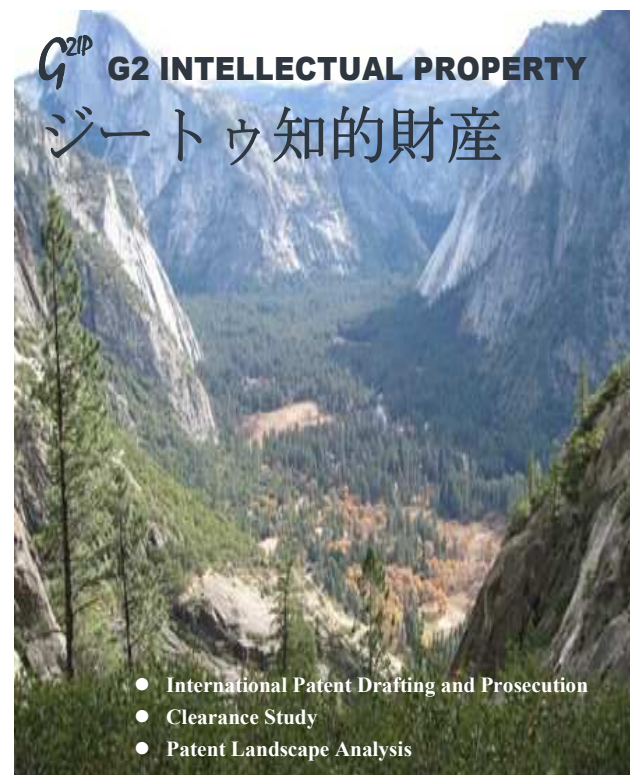

Benefits of our service

- The above services aim to serve the international community in Japan
- Clear communication with a native English IP professional
- Avoid expensive and limited patent law firm access in Japan
- All our IP professionals are highly qualified
